

The Learning Choice Academy Spring 2019 Full Day Class Descriptions

Grades K-5 - Adventure classes for Chula Vista and San Diego. Class syllabi will be available on-line the first week of classes.

Art (K-2 & 3-5)

Folk Art dates back to the beginning of time. The term "Folk Art" refers to art created by an "untrained" nonprofessional artist who is self-taught. Lessons will explore this cultural form of visual art recreating these handmade wonders both current and historical. History meets art means learning fun with purpose.

Broadway Bound Musical Theatre (K-2 & 3-5)

When William Shakespeare came to BROADWAY!" A creative, musical theatre program to introduce how the classics provide an essential foundation for all performing arts genres, sports, academics and even the journey for personal best. History is creatively integrated through original dialogue, song and dance; a valued recipe to ignite the imagination of every child. Using selections from Classic Shakespeare and Classical Broadway Musicals such as Hamilton, Cinderella, and Wicked, Matilda, the Lion King, Annie and more, this program specifically covers the components of acting, singing, and dancing. The preparation of various musical numbers will be the focus of the program, in addition to the vigorous training of basic dance technique, choreography, acting and vocal training to support communication skills.

Robotics (K-2 & 3-5)

Real World Robotics - WeDo 2.0 (K-2)

In Snapology's Real World Robotics class, students interested in technology will create robotic models inspired by real life robotic technologies. Students will learn about gear ratio, sensors simple machines and programming as they build alarm devices, earthquake detectors, robotic arms, and much more.

EV3 Robotics (3-5)

Using Lego® Mindstorm® EV3 Robotic kits and iPads or laptops, students will learn to build and program an autonomous robot to solve real world problems, solve challenges, and play games. Students will learn how to communicate with their robot. Using the EV3 programming language, students will learn how to make their robot follow simple commands, such as moving forward, as well as more complex maneuvers, such as using sensors to navigate obstacles.

Woodshop Wizards (K-2 & 3-5)

Woodshop Wizards is a hands on program that uses a variety of age appropriate woodworking hand tools and materials. These include hammers, nails, safety goggles, sanding blocks, sand paper, paint and paint brushes. We stress safety and proper use of tools and materials needed for the students to construct several different projects. They get a hands on experience using real tools and creatively painting and personalizing their projects to take home. Students utilize math skills and learn engineering concepts as they build their projects. Those repeating the sessions within the school year will have new projects to create. Students gain confidence and learn new skills.

Fall 2018 Full Day Class Descriptions - Grades K-5 - Adventure classes for Temecula.

Art with Bigfoot Graphics

Experience fun and enriching art projects led by Bigfoot Art. Students will learn to better their skills in drawing, using color and painting, as well as mixed media. Featured artist will expose students to some of the masters of the art world. This will be a nice time for creativity each week!

Research & Writing Using Google Apps

Practice how to create and to present an informative research report using Google Slides, Google Docs, and Google Drive. Using the Digital Content Portal Website, students will search topics using keywords, and will research and write interesting and relevant facts on their given topic. Learning how to insert images and type text into text boxes, student will create their PowerPoint research project to present to their peers, teachers, and parents.

Character Focused Karate

Karate training that focuses on the importance of teaching technique, but also on building good character and bringing out the best in each student. Students will learn the importance of respect, focus, stranger awareness, and bullying prevention in hopes of having a positive impact on the community and building character for future leaders.

Science-Creators Club

Students explore the concepts of marine engineering and mechanics, utilizing the power of gravity, air, and water. Students will take home their projects each day. Our Young Creators class is centered on exploring the concepts of building and construction through hands-on exploration and design. Students explore the engineering behind cars, planes, boats, and more in this fun and engaging experience.

Theatre

The world is your stage! Fun activities and lessons in drama, voice and dance will make you a seasoned actor. All students will perform in the end-of-session performance showcase on the last day of class.
